

Spruce Coffee Table

The spruce series draws inspiration from conifer cones of the alpine forest. The forms are assembled from imbricate plates, solid wood scales arranged in overlapping layers. The exterior of the form is then sculpted smooth, a very labor intensive process which rounds and softens the form. This coffee table may also be used as a base for a larger glass top.

Height	16 inches	40 cm
Width	26 inches	67 cm
Depth	26 inches	67 cm
